

DVD information

**Microsclerotherapy - Hints and Tips
Treating Spider Veins and Thread Veins
with microsclerotherapy and
compression.
Dr Steve Tristram**

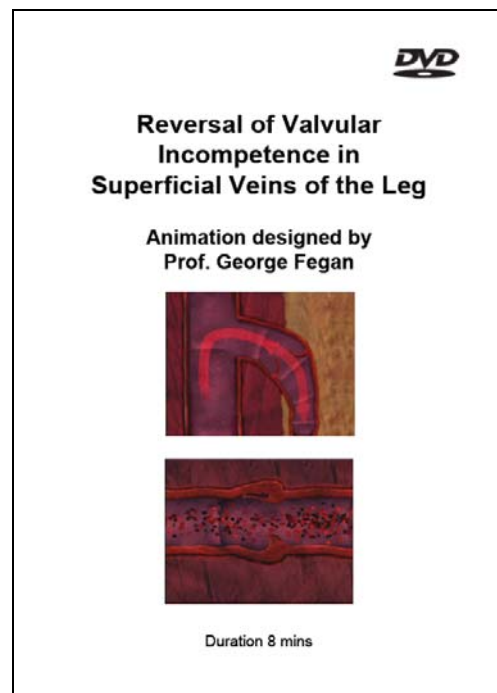

This DVD contains information on:

- Microsclerotherapy in general
- The consultation process
- Patient positioning
- Injection techniques
- Applying a compression bandage
- Applying a compression stocking
- Post treatment advice to patients

**Reversal of Valvular Incompetence in
Superficial Veins of the Leg
Animation designed by
Prof. George Fegan**

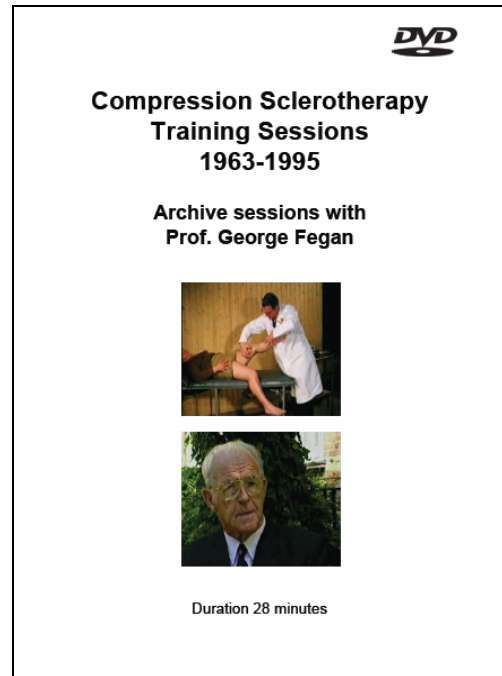

This DVD uses animation to show how the venous system of the lower leg functions. The animations shows how the calf pump and venous valves work along with the relationship between the deep and superficial veins. The DVD also shows how incompetent perforating veins can cause varicosities in the superficial leg veins and how obliteration of the incompetent perforator can restore valvular competence in the superficial veins.

**Compression Sclerotherapy
Training Sessions
1963-1995**

**Archive sessions with
Prof. George Fegan**

This DVD contains interviews with Prof. George Fegan. The pioneer of modern sclerotherapy discusses his ideas on reflux, the causes of varicose veins and their treatment. The DVD also contains archive footage from the '60's and '93 where Prof. Fegan demonstrates patient assessment plus his injection and bandaging techniques.

Disclaimer:

Please note that the DVDs are not intended as a replacement for training. We recommend anyone interested in learning how to do sclerotherapy should attend an accredited course or be taught by an experienced practitioner.
